

**Response to our TDEG election priorities and questions – From Rachel Elnaugh  
(candidate for the Love party)**

Ms Elnaugh chose not to address our specific questions – so her full email is provided below –

I have read through the information which you sent me. Zooming out of the minutiae, a few things occur to me:

~ What is truly needed is a raising of the Consciousness. A quantum leap in Evolution where it would be unthinkable to harm Nature.

This includes Human Beings ~ for surely we are part of Nature, whose rights must be respected too? As a shamanic practitioner I know the healing power of restoring our connection to Nature. While it is important to conserve our natural environment, let us also find ways to fully embrace The People (including the many tourists pouring out of the cities every weekend to find relief from the stress and anxiety caused by being fully embedded in the False Matrix) ~ and not see them as 'the enemy'.

~ We need to develop sufficient discernment to recognise how the 'Net Zero' Agenda is being utilised to drive new markets for Big Corporations. I urge you and your members to watch this video of the highly respected Sandi Adams explaining the extent to which we are being hoodwinked by the 'Green Agenda' which in truth is underpinned by Capitalist forces. [https://youtu.be/aPJusgHFcjl?si=1W\\_VqXL-4la0V-XU](https://youtu.be/aPJusgHFcjl?si=1W_VqXL-4la0V-XU)

This is not 'conspiracy theory' it is conspiracy FACT. Supporting evidence is available via the WEF website ~ all hidden in plain sight.

~ Please ask yourselves, at what point did you give your power away ~ to Governments, to 'Authorities', to Politicians?

I am standing as an Independent candidate for Derbyshire Dales not to promise to fix everyone's problems, nor to present a 'magic wand' manifesto.

I am standing as a representative of The People ~ not bound to any Party Political agendas ~ who will listen, and be a powerful voice for The People of Derbyshire Dales in Parliament.

All the above said, as a Nature lover as well as an experienced entrepreneur/businesswoman, I truly believe that it is possible to find innovative ways for us to come together in co-creative collaboration to resolve all the issues you have raised.

However this is going to need a Visionary approach, with long term thinking.

I am absolutely in favour of the restoration of the areas railways and indeed yesterday I interviewed Martyn Guiver (who is Operations Director of the Peaks and Dales Line) at

the old Bakewell Station ~ a hugely inspiring conversation about how this could be done without detriment to walkers/cyclists, and residents (both human and wildlife) along the line. I will send the link to the video as soon as it is live.

There is also potential for a tremendous revenue stream from the railway and I would advocate that ownership of the railway is kept with The People of Derbyshire Dales ~ and not offered up to yet another Big Corporation syphoning off profits to enrich its shareholders.

I am absolutely in favour of affordable housing. However, what is needed here is a radical transformation in our approach to Planning. It has to be said that the Peak District National Park 'Authority' has essentially turned the entire area into a Museum.

Personally I would be in favour of taking back power and control from Westminster, lifting as much red tape as possible, and returning the power to the local People to organise themselves to the benefit of the environment, as well as the local economy.

Let's find ways to support the People of Derbyshire Dales to move from just surviving to fully thriving!

LOVE

Rachel
